BINUS

Closing the Academic Year with Gratitude & Reflection

Dear Fellow BINUSIANS,

As we reach the final weeks of this academic year, I want to take a moment to look back on everything we have accomplished together in the past 10 months. This past year allowed us to witness growth, learning, and memorable milestones, none of which would have been possible without the collective strength of our community.

A school thrives when all of its parts work together, and we see that clearly in the shared journey we have experienced. Our students brought their curiosity, hard work, and energy into our classrooms every day, showing remarkable growth that they should be truly proud of.

This progress was only made possible because of the strong partnership and trust of our parents, whose collaboration with our team has been essential to our success.

At the forefront of guiding our students through it all was our dedicated team of teachers, who worked tirelessly to provide the best academic experiences for them. Behind the scenes, our staff, with their professionalism, care, and tireless effort, created a safe and inspiring environment for everyone.

As we look forward to a well-deserved break, I want to express my deepest thanks to each of you for your support and contributions throughout this year. I wish you all a safe, restful, and refreshing holiday. Let us carry forward this sense of gratitude and reflection into the new school year ahead.

THANK YOU BINUSIANS!

Mr. Alexandre Trespach Nenes
Principal of BINUS SCHOOL Surabaya

Middle School Programme

Young Binusians Shine at World Scholar's Cup Regional Round 2026

A proud moment for the BINUSIAN community as nine Grade 7 students earned medals and successfully qualified for the World Scholar's Cup Global Round 2026. Their achievement reflects not only academic excellence, but also confidence, critical thinking, teamwork, and the ability to collaborate effectively under pressure.

Throughout the competition, our students demonstrated resilience, curiosity, creativity, and a strong passion for learning while proudly representing the school on an international stage. Competing alongside students from different backgrounds and countries also gave them valuable opportunities to strengthen their communication skills, broaden their perspectives, and develop a global mindset.

We would also like to extend our sincere appreciation to the parents and teachers for their continuous support, encouragement, and guidance throughout this journey.

This accomplishment is a meaningful milestone for the students as they continue to grow into future ready learners who are able to communicate ideas confidently, think critically, and work collaboratively in a global environment.

Congratulations to our Grade 7 students on this outstanding accomplishment. Your hard work and dedication continue to inspire the entire BINUSIAN community.

Primary Programme

Terrarium making

As part of their learning, our Grade 2 students are engaging in meaningful, hands-on experiences by planting butterfly pea flowers, allowing them to observe how living things grow and develop over time.

Through this process, they begin to understand how plants interact with their surroundings and contribute to the environment in thoughtful and interconnected ways. In the Unit of Inquiry, "Sharing the Planet," students explore the relationships between biodiversity, ecosystems, and habitats, deepening their understanding of how all living things are connected.

These experiences encourage curiosity and critical thinking as students reflect on the role they play in caring for the natural world. As they observe growth and ask questions, they begin to understand how their actions can positively impact the environment and the living things within it.

In conclusion, these hands-on learning opportunities not only strengthen students' scientific understanding but also nurture a sense of responsibility and respect for the environment. By engaging directly with nature, they develop a lasting awareness of their role in sustaining and protecting the world around them.

Early Years Programme

Technology as Part of the Modern Music Recording and Learning Experience

At BINUS SCHOOL Surabaya, technology plays an important role in supporting Early Years students in their music learning journey. Through interactive music applications, audio recordings, videos, and simple digital activities, children are introduced to music in ways that are fun, engaging, and appropriate for their age and development.

During music lessons, students explore rhythm, melody, movement, and sound while developing confidence and creativity. They also learn important classroom skills such as listening carefully, following instructions, recognizing musical cues, and participating actively during group activities.

Through these experiences, children improve their focus, coordination, communication, and independence in a positive learning environment.

Technology also allows students to listen to their own voices and simple performances, helping them appreciate their progress and enjoy expressing themselves through music.

By integrating technology into music education, Early Years students at BINUS SCHOOL Surabaya are encouraged to explore, create, and enjoy music while developing important social, emotional, and cognitive skills that support their overall growth and learning experience.

News & Updates

STREAMS Fest Showcases Student Creativity and Leadership

Our school community proudly celebrated the success of STREAMS Fest 2026, a special event fully initiated and led by our Grade 7 students. The festival became a meaningful platform for students to showcase their creativity, teamwork, and confidence through various inspiring projects and interactive presentations.

Throughout the event, students demonstrated how classroom learning can be transformed into real-life experiences. From innovative project displays to engaging presentations, every activity reflected the students' enthusiasm, critical thinking, and passion for learning. One of the highlights of the festival was the earthquake simulation drama, where students creatively combined knowledge, performance, and collaboration to deliver an educational and impactful experience for the audience.

Through STREAMS Fest, students were encouraged to explore, create, and share their ideas while celebrating the learning process in a collaborative and inspiring environment.

More than just a showcase, STREAMS Fest became a celebration of creativity, innovation, and student voice, highlighting our students' growth as confident and future ready young leaders.

News & Updates

Developing Creativity and Innovation through LEGO & Coding Activities

Students enjoyed an engaging hands-on learning experience through interactive LEGO and coding activities designed to develop creativity, innovation, and teamwork. During the sessions, students explored how technology and engineering can be applied in everyday life by building smart devices and simple machines using LEGO models.

Students were also introduced to basic coding and programming concepts, helping them strengthen their logical thinking, problem-solving, and digital literacy skills in a fun and interactive environment. By combining creativity with technology, students were encouraged to think critically and transform their ideas into meaningful creations.

The programme also highlighted the importance of collaboration, as students worked together in teams to share ideas, solve challenges, and complete projects collectively. Through these activities, students developed confidence, communication skills, and teamwork while experiencing the value of collaborative learning.

Through this meaningful learning journey, students continued to enhance their S.T.R.E.A.M.S competencies, particularly in Technology, Engineering, and Arts, while gaining valuable experiences that inspire curiosity, creativity, and future-ready skills.

News & Updates

Shining on Stage: BINUS SCHOOL Surabaya PERFORMANCE DAY

BINUS SCHOOL Surabaya proudly celebrated a meaningful milestone as our students took the stage at Performance Day 2026, held at the Pakuwon Mall, Surabaya.

This exciting event was filled with energy, creativity, and joyful moments as our Early Years (EY) and Primary students confidently showcased their talents in front of a wider audience. From cheerful performances to engaging stage acts, every appearance reflected not only their growing abilities but also their courage, confidence, and enthusiasm to express themselves on stage.

More than just a performance opportunity, Performance Day 2026 became a valuable experience for our students to develop self-confidence, communication skills, and teamwork while representing the school with pride. It was a wonderful moment to witness our young learners shine, support one another, and create memorable experiences together.

News & Updates

WINNER OF STUDENTS DESIGN COVER JOURNAL

BINUS SCHOOL Surabaya proudly celebrates the creativity and imagination of its students through the Student Cover Journal Challenge. Inspired by the theme “Empowering the Future with Digital Excellence,” students were encouraged to showcase their vision of future learning, innovation, and technology through artistic journal cover designs.

Each artwork reflects unique ideas of how digital advancement, creativity, and collaboration can shape a better future. Through this challenge, students were able to express their imagination while developing confidence, innovation, and future-ready thinking.

Congratulations to the featured winners:

Zaeem P3, Clarinda MS 7, Christian P2, Naureen P1, and Anthony MS 7 for their inspiring and outstanding creations. Their works truly embody the spirit of creativity and digital excellence at BINUS SCHOOL Surabaya.
